## Foreword

Corruption is a mutative enemy and its amorphous transitions explain the complexity of containing it. Fighting Corruption therefore demands a continuous review of tools, strategies and approaches. Preventive perspectives come in handy in this respect because they save time, and resources; they are people oriented and sustainable. The Corrupt Practices and Other Related Offences Commission (ICPC) has promoted and driven preventive measures against corruption as provided by its establishment Act, the Corrupt Practices and Other Related Offences Act 2000.

One of such preventive tools is the Ethics and integrity Compliance Scorecard (EICS) which assesses adherence of government's Ministries, Departments and Agencies (MDAs) to extant rules, guidelines, standards, procedures, etc that uphold ethics and integrity in the discharge of their mandates and identify organisational loopholes and gaps that may trigger corrupt practices in public entities.

Public bodies are assessed in aspects of Management Culture and Structure, Financial Management System and Administrative Systems. The report of the exercise provides recommendations which the Commission offers to MDAs and government on issues requiring requisite intervention and implementation.

The scorecard was deployed physically and virtually nationwide in 360 MDAs in 2021. The outcome of the exercise elicited evidence of vulnerabilities and non-compliance by the assessed entities that facilitates corruption and corrupt practices in their operations, thereby requiring close monitoring of identified MDAs by the Commission. Howbeit, though none of the assessed organisations attained the full compliance rating, a good number of MDAs deserve commendations for their substantial compliance to the key performance indicators of the scorecard.

A source for concern is that a number of MDAs did not make submissions of their EICS for the 2021 deployment to the Commission. The Commission considers such non-responsive organisations as unwilling to make the required disclosures and are therefore regarded as "high corruption risk" bodies and are consequently liable to closer scrutiny for possible violations and infractions.

Our public bodies are in dire need of reforms against eviscerating corruption. Leadership and staff of these institutions must imbibe anti-corruption principles and standards as enumerated by the EICS for the good progress and growth of the MDAs. ICPC will continue to insist that due structures are enthroned by public institutions to foster compliance to ethical standards that uphold integrity in government business.

**Prof. Bolaji Owasanoye, SAN**  
*Hon. Chairman, ICPC*

## Executive Summary

The Ethics and Integrity Compliance Scorecard (EICS) or 'the Scorecard' was conceived and developed as an evaluation tool by the Independent Corrupt Practices and Other Related Offences Commission (ICPC), pursuant to its preventive mandate as contained in Section 6 (b-d) of the Corrupt Practices and Other Related Offences Act 2000. EICS was developed by the ICPC in collaboration with the Justice for All (J4A)/DFID programme in 2015 with the support of its successor programme, Rule of Law and Anti-Corruption (RoLAC) project supported by the European Union and other donor agencies. The pilot deployment in Ministries, Departments and Agencies (MDAs) was conducted in 2016 in (20 MDAs) and subsequently carried out in 2019 (280 MDAs); 2020 (350 MDAs); and 2021 (360 MDAs). EICS assesses organizational and corporate culture of ethics and compliance programmes. It also assesses the integrity and fidelity of systems to mitigate their frailties and fragilities. It contains 112 questions covering 3 main indicators and 12 sub indicators that highlight the ethics and compliance activities of the public entity assessed.

Objectives of the evaluation of MDAs through the ethics and integrity compliance standards are particularly to monitor and evaluate MDAs on the Key Performance Indicators (KPIs) and sub-indicators and ascertain their level of compliance with institutional ethics and integrity requirements and avail the ICPC with a tracking and diagnostic tool and intelligence to monitor system risks and vulnerabilities and direct management and leadership of MDAs to take appropriate measures to mitigate them. The Scorecard gives statistical evidence of public systems and practices, strengths, failures and vulnerabilities demanding the agency's specific action or government intervention. Analysis of the overall scores and ratings take cognizance of sector, field, geographic location, industry size and service impact of the agency.

Physical administration of the scorecard was done in 174 MDAs in the Federal Capital Territory, while virtual deployment was conducted in 186 MDAs outside the FCT. MDAs were selected from various segments of the public sector including non-responsive public institutions to the 2020 and earlier deployments which were subsequently listed as "High Corruption Risk" agencies. Deployment officers physically visited selected MDAs in the FCT while MDAs in the states were contacted by correspondence to participate through Commission's website. Notably, the EICS also extracts an undertaking from the Chief Executive Officers to ascertain the veracity and correctness of the completed instrument. A total of 301 MDAs out of 360 selected for the 2021 deployment were responsive. MDAs are assessed through quantitative score, with supporting documents giving qualitative validation for answers submitted. Details of activities, initiatives and records by the MDA justifying and clarifying them, are filled into the questionnaire.

In addition to publishing a report upon concluding the deployment, MDAs assessed are informed in writing of their scores and ratings with the findings on them, highlighting the notable strengths and weaknesses observed and suggestions on how to improve their operations including financial and managerial systems.

Challenges encountered include claims by MDAs of unstable electricity or lack of internet access; lack of certain manpower to act due to COVID 19 restrictions; trickling in of online submissions from agencies; complaints of difficulty in uploading large documents; submission of illegible, faint and sometimes inapplicable documents. Certain MDAs declined submitting supporting documents asserting national security and confidentiality of the documents and sometimes non-existence of the documents requested.

## 2. Findings

Lapses in operational compliance were noticed in the Management Structure and Culture and Administrative Systems in most MDAs whilst there was marginal improvement in compliance by many MDAs in Financial Management Systems. Other highlights of the findings include:

- i. 30 MDAs (10.1% of the number assessed) do not have their Vision, Mission and Core Values publicly displayed for public information. 227 MDAs (76.2% of the number assessed) not having a system for staff to sign off as having read and understood core values, mission and vision statements of the parastatals.
- ii. 167 MDAs (56.0% of the number assessed) indicated that personnel did not report non-compliance by errant colleagues during the period reviewed.
- iii. 169 MDAs (56.7% of the number assessed) do not have policies or codes regarding acceptance of gifts, donations, hospitality and therefore not enforced. These lapses are veritable channels for receipts of gratification on pretext of gifts and hospitality by staff in the identified MDAs.
- iv. 140 MDAs (47.0% of the number assessed) do not have Strategic Action Plan while 187 MDAs (62.8% of the number assessed) did not conduct monitoring and evaluation of their projects in the 6 months before the deployment and assessment.
- v. System Study and Review or Corruption Risk assessment was not conducted in 253 MDAs (84.9% of the number assessed) within the year under review. This also indicates that a sizeable number of agencies are not subscribing to or initiating preventive measures.
- vi. 138 MDAs (46.3% of the number assessed) do not have functional and effective Assets Verification Units in contravention of government circular directing MDAs to establish the Unit.

- vii. 137 MDAs (46.0% of the number assessed) do not have records of submitted audited accounts to the Office of the Auditor General and Public Accounts Committee for the last three years.
- viii. 127 MDAs (42.6% of the number assessed) did not conduct annual needs assessment preparatory to their procurements, 109 MDAs (36.6% of the number assessed) do not have an annual procurement plan and in 119 MDAs (39.9% of the number assessed), procurement plans were not part of the annual budgets. Furthermore, in 74 MDAs (24.8% of the number assessed) procurement process did not comply with the Public Procurement Act, 2007; In 100 MDAs (33.6% of the number assessed) Procurement Planning Committees composition were not in compliance with PPA, 2007; same defect was noticed in 88 MDAs (29.5% of the number assessed) where Tenders Boards composition was in contravention of the PPA 2007. This promotes procurement and due process abuse and fraud.
- ix. 20 MDAs (7% of the number assessed) and specifically the Federal Medical Centres are operating without legal instruments establishing the organization. Federal Medical Centres are presently administered by the Federal Ministry of Health with University Teaching Hospitals Act pending the passage of their Establishment Act now before the National Assembly.
- x. Ethics and Compliance Education which is crucial in enshrining integrity within public systems, is not being prioritized as required. 196 MDAs (65.8% of the number assessed) did not have a training plan and 171 MDAs (57.4% of the number assessed) did not support Ethics and Compliance initiatives.
- xi. 109 MDAs (36.6% of the number assessed) have not inaugurated and inducted ACTUs therefore such MDAs are considered not to have existing ACTUs. While in 147 MDAs (55.7 of the number assessed) the ACTUs are inactive due to inadequate or poor support by managements.
- xii. 234 MDAs (78.5% of the number assessed) do not have complaint and whistleblowing mechanism to assist in improving the integrity and compliance issues within the MDAs. 148 MDAs (49.75% of the number assessed) do not have dedicated channels for corruption reportage.
- xiii. 163 MDAs (54.7% of the number assessed) do not have domesticated professional codes of ethics or conduct with clearly articulated sanctions against violations. The inference is that staff are not sanctioned for violations.
- xiv. Although all the MDAs visited said there was no employment in 2020, responses to request on recruitment from the Office of the Head of Civil Service of the Federation vide letter Ref: HCSF/2031/VOLII dated 8<sup>th</sup> October,2021, revealed that 14 MDAs out of the 26 MDAs that obtained

waiver from the Office of the Head of Civil Service of the Federation to carry out recruitment exercise in 2020 were captured in the deployment exercise.

This reflects a total of 1959 out of 3309 recruitment approved. However, in this survey, all MDAs assessed denied employing staff during the period under review. Though personnel of these agencies are regularly exiting the system through retirements, resignations, terminations, dismissals, deaths, etc., yet the number of personnel keep rising and the wage bill of government keeps increasing.

- xv. 206 MDAs (69.1% of the number assessed) do not have a reward system to encourage ethical behaviour and compliance with established rules and regulations.

### **3. Recommendations**

1. ICPC to advise MDAs on essence and imperative of adopting and displaying their vision, mission and core values in appropriate media for public and general information.
2. ICPC to advise and instruct MDAs to produce, adopt, communicate and enforce policies and codes on whistleblowing, professional ethics, guides on acceptance of gifts, donations, hospitality to reduce and mitigate corruption within the MDAs.
3. The Secretary to the Government of the Federation to inform and advise the President and Commander in-Chief on the imperative to appoint and inaugurate boards of statutory institutions to guide, lead and manage the MDAs. The findings that certain MDAs do not have boards indicate opaque and rudderless leadership structure which negatively impacts on governance, validity and productivity of the affected MDAs.
4. ICPC to intensify its advocacy to MDAs on the importance of producing and implementing Strategic Plan, conducting System Study and Review and Corruption Risk Assessment to assist in institutionalizing integrity, accountability and appropriate preventive measures to diminish and mitigate corruption.
5. ICPC to advise, direct and instruct MDAs on the policy of keeping functional and effective Asset Verification Units and registers to ensure due monitoring and tracking of public assets including procurement and disposal.
6. Leadership of MDAs must maintain Needs Assessment files and procurement plans and conduct needs assessment preparatory to procurement, and ensure procurements comply with procurement legislations like the Public

Procurement Act, 2007, work with the Procurement Planning Committee and Tenders Board.

7. Anti-Corruption agencies must enforce compliance and adherence of MDAs to the provisions of the Public Procurement Act, 2007 through Corruption Risk Assessment, System Study and Review, Budget Implementation Monitoring, Investigation and possible prosecution of established breaches.
8. Office of the Auditor General of the Federation to direct MDAs to submit audited accounts to OAGF and the Public Accounts Committee. Lists of defaulting MDAs should be submitted to the Office of the President and Commander-in-Chief and Office of the Secretary to the Government of the Federation and the ICPC.
9. The Head of Civil Service of the Federation should direct and instruct MDAs to establish, inaugurate, induct and adequately fund ACTUs being vital tools to promote and institutionalize integrity, accountability and anti-corruption precepts in MDAs. Funding of ACTUs will be enhanced and sustained by creating a budget line for ACTUs under the current budgeting system.
10. ICPC should liaise with the Office of the Accountant General of the Federation and Head of Civil Service of the Federation to periodically audit personnel costs of MDAs against numbers recruited and those exiting service.
11. Further inquiries and investigation should be conducted on personnel cost of government especially surreptitious recruitments and appointments called "replacements" which are generally denied by MDAs but personnel cost remains huge despite exit of staff through retirements, resignations, terminations, dismissals, deaths, etc.,.
12. MDAs that consistently appear in the "High Corruption Risk" categorization should be considered for system study and review of their systems or investigation where appropriate, to ensure adherence to public policy, laws, regulations and directives.
13. The Presidency and SGF to direct MDAs to draw and implement Strategic Action Plan and conduct monitoring and evaluation of their projects annually or biannually
14. Attorney General and Minister of Justice should examine records of MDAs without establishment instruments and present appropriate bills for such agencies before the National Assembly to regularize their existence.
15. It is imperative that Ethics and Compliance Education which is crucial in building public systems and practices of integrity, is prioritized by all MDAs. This also requires ethics training plans and compliance initiatives.

#### 4. Conclusion

The 2021 EICS deployment and assessment of public organizations compared previous and current responses of MDAs to the deployment aimed at engendering organizational, sectoral and national improvements in the MDAs. Recommendations proffered will further boost the acceptance, validity and sustainability of the annual exercise.

The Commission enjoins all MDAs to domesticate the tool in their organizations as enforcement and other measures such as System Study and Review, investigation and possible prosecution of offences may be taken against non-responsive (“High Corruption Risk) MDAs. Participation and adoption of the ethics and integrity compliance practices by organisations are critical to the assimilation and success of National Ethics and Integrity Policy, a fundamental agent for national rebirth and development.

# ETHICS AND INTEGRITY Compliance Scorecard of MDAs of the Federal Republic of Nigeria 2021

## Introduction

The Ethics and Integrity Compliance Scorecard (EICS) or 'the Scorecard' was conceived and developed as an evaluation tool by the Independent Corrupt Practices and Other Related Offences Commission (ICPC), pursuant to its preventive mandate as contained in Section 6 (b-d) of the Corrupt Practices and Other Related Offences Act 2000. The tool which is an expanded questionnaire is the outcome of the Commission's reinforced drive for probity, strengthening integrity and accountability while checking abuse and corrupt practices in government Ministries, Departments and Agencies (MDAs).

EICS was developed by the ICPC in collaboration with the Justice for All (J4A)/DFID programme in 2015 with the support of its successor programme Rule of Law and Anti-Corruption (ROLAC) project supported by the European Union and other donor agencies. EICS assesses organizational and corporate culture of ethics and compliance programmes. It also assesses the integrity and fidelity of systems to mitigate their frailties and fragilities. It contains 112 questions covering 3 main indicators and 12 sub indicators that highlight the ethics and compliance activities of the public entity assessed.

This monitoring and evaluation tool has been reviewed over the years to reflect and accommodate new trends and exigencies in the deployment process and it is domiciled in the System Study and Review Department (SSRD) of the Commission. The pilot deployment conducted was in 2016 (20 MDAs). Other deployments were carried out in 2019 (280 MDAs); 2020 (350 MDAs); and 2021 (360 MDAs).

Responses by MDAs have improved on each deployment i.e. in 2019 (100%); 2020 (65.5%); 2021 (83.7%). The 2019 deployment exercise recorded 100% response as the administering teams physically deployed the tool on selected MDAs. In 2020, deployment was entirely virtual due to the COVID-19 challenges, while 2021 deployment was both physical and virtual.

As an applied research tool, the Scorecard evaluates public bodies or MDAs' compliance to ethics, integrity, statutes, standards, policies, directives and regulations based on three distinct parameters of organisational behaviour:

- Formal procedures (what is intended or expected to be done by the public body)
- Informal procedures (what is actually done by the public body)
- The management of work (How supervision is done by the public body)

The 2021 deployment exercise was conducted from 19 April to 30 July 2021 covering and reviewing MDAs' activities for year 2020.

## Objectives

The Scorecard focuses on assessing the compliance adherence of government MDAs based on the following three Key Performance Indicators (KPIs):

- Management Culture and Structure (MCS)
- Financial Management Systems (FMS)
- Administrative Systems (AS)

EICS deployment or survey is essentially to track ethical, integrity and compliance loopholes or gaps in MDAs and thereupon recommend mitigating measures to management of public agencies and the government. The Scorecard gives statistical evidence of public systems and practices, strengths, failures and vulnerabilities demanding the agency's specific action or government intervention.

KPIs and the sub-indicators set out in the scorecard are also focused to identify ethics and integrity benchmarks that MDAs must adhere to in management and leadership, financial performance and administrative processes to ensure productivity and quality service delivery.

Objectives of the evaluation of MDAs through the ethics and integrity compliance standards are to:

- (a) Monitor and evaluate MDAs on the KPIs and sub-indicators and ascertain their level of compliance with institutional ethics and integrity requirements.
- (b) Present a platform for comparing and assessing weaknesses that make MDAs vulnerable to corruption.
- (c) Avail the ICPC with a tracking and diagnostic tool and intelligence to monitor system risks and vulnerabilities and direct management and leadership of MDAs to take appropriate measures to mitigate them.
- (d) Afford MDAs the leverage to drive an in-house crusade against corruption (as a self-evaluation tool).
- (e) Supply MDAs with feedbacks on their performance and to utilise the outcomes for improvement of their systems and operations.
- (f) Determine an objective rating of MDAs and how they compare with peers in same sector, business or groups thereby encouraging innovation, productivity, and creativity among public organizations to enhance their systems and operations.
- (g) Inform government on formulating appropriate policies for effective oversight of public bodies in the discharge of their mandates for quality service delivery.

## Methodology

In the 2021 deployment exercise, a total of 360 MDAs were selected across the federation. Physical administration of the scorecard was done in 174 MDAs in the Federal Capital Territory, while virtual deployment was conducted in 185 MDAs outside the FCT. MDAs were selected from various segments of the public sector, based on their contributions to the nation's economy; organisational sensitivity and significance in ensuring government's quest for optimal service delivery; the ICPC mandate of ensuring transparency and accountability in public bodies; and non-responsive public institutions to the 2020 and other deployments which were subsequently listed as "High Corruption Risk" agencies. The Commission is following the progress of selected "High corruption risk agencies" through the EICS to ensure the agencies are exited from that disreputable classification.

Teams of ICPC officers physically visited MDAs in the FCT for the deployment exercise while MDAs in the states were contacted by correspondence to participate in the survey by downloading the tool from the Commission's website through a link provided. The MDAs completed the tool, uploaded their required documents and submitted within the stipulated time frame. Agencies were also requested to provide focal or contact persons and their telephone numbers for resolution of enquires and issues during the deployment for a seamless exercise. Notably, the EICS also extracts an undertaking from the Chief Executive Officers to ascertain the veracity and correctness of the completed instrument. MDAs are assessed through quantitative score, with supporting documents giving qualitative validation for answers submitted. Details of activities, initiatives and records by the MDA justifying and clarifying them, are filled into the questionnaire.

Performance of agencies are also reflected in their status and reputation with key regulatory and enforcement agencies including Federal Inland Revenue Service; Anti-Corruption Agencies; Bureau of Public Procurement and others. MDAs with egregious records of organisational or personnel infractions had impact on their grades and flagged for further inquiries or enforcement activities. Analysis of the overall scores and ratings take cognizance of sector, field, geographic location, industry size and service impact of the agency.

In addition to publishing a report upon concluding the deployment, MDAs assessed are informed in writing of their scores and ratings with the findings on them, highlighting the notable strengths and weaknesses observed and suggestions on how to improve their operations including financial and managerial systems.

## Limitations

- i. The COVID pandemic and the attendant restrictions imposed by the government, mandating certain officers to work from home and the protocol on meetings, movements and visits imposed limitations on the exercise.

- ii. Challenges associated with virtual deployment include MDAs' claims of unstable electricity or lack of internet access; lack of manpower to act; trickling in of online submissions from agencies; complaints of difficulty in uploading large documents; submission of illegible, faint and sometimes inapplicable documents.
- iii. Some MDAs, despite reminders, failed to submit liaisons or contact persons to enable effective linkage between the Commission and the respective MDAs.
- iv. The Judiciary Staff Union of Nigeria (JUSUN), a body to which all Judiciary workers nationwide are affiliated, embarked on industrial action prior to the commencement of the deployment and the federal judicial institutions could not be assessed until after the timeline for the deployment exercise. In some states, MDAs declined response claiming security challenges and unavailability of requested documents.
- v. Certain MDAs declined submitting supporting documents asserting national security and confidentiality of the documents and sometimes non-existence of the documents requested.

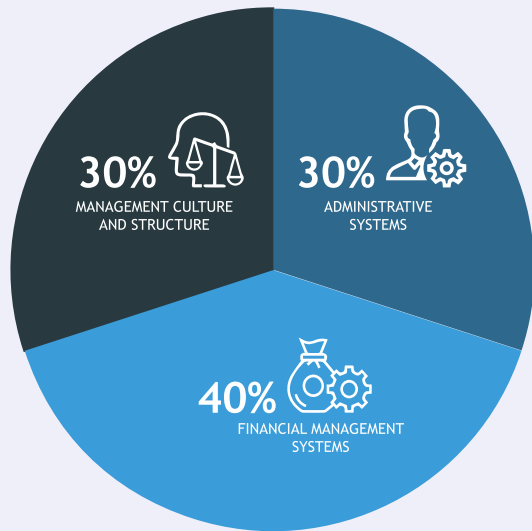

### Sectors Assessed

Sectors assessed include Ministries, Presidency and Extra-Ministerial Agencies, Regulatory Agencies, Justice and Law Enforcement, Finance and Banking, Education, Health, Water Resources, Agriculture, Roads, Housing and Energy, Transportation, Information and Communication, Environment, Science and Technology, Solid Minerals and Petroleum Resources. These sectorial classifications as earlier indicated, were to assess as much as possible sector organizational groups and activities to identify weak systems and portions requiring policy direction and statutory interventions.

TABLE

## 7. Findings

- i. 30 MDAs (10.1% of the number assessed) do not have their Vision, Mission and Core Values publicly displayed for public information.
- ii. 227 MDAs (76.2% of the number assessed) do not have a system for staff to sign off as having read and understood core values, mission and vision statements of the parastatal.
- iii. 167 MDAs (56.0% of the number assessed) indicated that personnel did not report non-compliance by errant colleagues during the period reviewed.
- iv. 169 MDAs (56.7% of the number assessed) do not have policies or codes regarding acceptance of gifts, donations, hospitality and therefore not enforced. These lapses are veritable channels for receipts of gratification on pretext of gifts and hospitality by staff in the identified MDAs.
- v. 20 MDAs (6.6% of the number assessed) do not have Boards in place. In MDAs where boards are in place, 100 (37.0%) of the MDAs did not hold regular meetings; while 164 MDAs (60.7%) did not conduct periodic self-assessment for board members.
- vi. 140 MDAs (47.0% of the number assessed) do not have Strategic Action Plan while 187 MDAs (62.8% of the number assessed) did not conduct monitoring and evaluation of their projects in 6 months before the deployment and assessment.
- vii. System Study and Review or Corruption Risk assessment was not conducted in 253 MDAs (84.9% of the number assessed) within the year under review. This also indicates that a sizeable number of agencies are not subscribing to or initiating preventive measures.
- viii. 138 MDAs (46.3% of the number assessed) do not have functional and effective Assets Verification Unit in contravention of government circular directing MDAs to establish the Unit.
- ix. 137 MDAs (46.0% of the number assessed) do not have records of submitted audited accounts to the Office of the Auditor General and Public Accounts Committee for the last three years.
- x. 109 MDAs (36.6% of the number assessed) Internal Audits are not headed by officers on directorate cadre or its equivalent, thereby giving no independence for internal auditors.
- xi. 127 MDAs (42.6% of the number assessed) did not conduct annual needs assessment preparatory to their procurements, 109 MDAs (36.6% of the

number assessed) do not have an annual procurement plan and in 119 MDAs (39.9% of the number assessed), procurement plans were not part of the annual budgets.

- xii. In 74 MDAs (24.8% of the number assessed) procurement process did not comply with the Public Procurement Act, 2007; In 100 MDAs (33.6% of the number assessed) Procurement Planning Committees composition were not in compliance with PPA, 2007; same defect was noticed in 88 MDAs (29.5% of the number assessed) where Tenders Boards composition was in contravention of the PPA 2007. This promotes procurement and due process abuse and fraud.
- xiii. 127 MDAs (42.6% of the number assessed) did not invite relevant professional bodies, NGOs and Stakeholders to be part of Procurement Processes in compliance with the provisions of the PPA, 2007.
- xiv. 20 MDAs (7% of the number assessed) are operating without legal instruments establishing the organization. Furthermore, the Federal Medical Centres spread around the country are presently administered by the Federal Ministry of Health with University Teaching Hospitals Act pending the passage of their Establishment Act now before the National Assembly.
- xv. Ethics and Compliance Education which is crucial in enshrining integrity within public systems, is not being prioritized as required. 196 MDAs (65.8% of the number assessed) did not have a training plan and 171 MDAs (57.4% of the number assessed) did not support Ethics and Compliance initiatives.
- xvi. 109 MDAs (36.6% of the number assessed) have not inaugurated and inducted ACTUs therefore such MDAs are considered not to have existing ACTUs. While in 147 MDAs (55.7 of the number assessed) the ACTUs are inactive due to inadequate or poor support by managements.
- xvii. 234 MDAs (78.5% of the number assessed) do not have complaint and whistleblowing mechanism to assist in improving the integrity and compliance issues within the MDAs. 148 MDAs (49.75% of the number assessed) do not have dedicated channels for corruption reportage.
- xviii. 163 MDAs (54.7% of the number assessed) do not have domesticated professional codes of ethics or conduct with clearly articulated sanctions against violations. The inference is that staff are not sanctioned for violations.
- xix. 206 MDAs (69.1% of the number assessed) do not have a reward system to encourage ethical behaviour and compliance with established rules and regulations.
- xx. All MDAs assessed denied employing staff during the period under review.

Though personnel of these agencies are regularly exiting the system through retirements, resignations, terminations, dismissals, deaths, etc., yet the number of personnel keeps rising and the wage bill of the government keeps increasing.

- xxi. Agencies with board governance denied the existence of rivalry, acrimony and in-fighting within and between the governing boards and management.
- xxii. Although all the MDAs visited said there was no employment in 2020, responses to request on recruitment from the Office of the Head of Civil Service of the Federation vide letter Ref: HCSF/2031/VOLII dated 8<sup>th</sup> October, 2021, revealed that 14 MDAs out of the 26 MDAs that obtained waiver from the Office of the Head of Civil Service of the Federation to carry out recruitment exercise in 2020 were captured in the deployment exercise.

This reflects a total of 1959 out of 3309 recruitment approved. However, in this survey, all MDAs assessed denied employing staff during the period under review. Though personnel of these agencies are regularly exiting the system through retirements, resignations, terminations, dismissals, deaths, etc., yet the number of personnel keep rising and the wage bill of government keeps increasing.

## 8. Performance of MDAs in Key and Sub-Indicators of the Scorecard

- 8.01 Under the key indicator Management Culture and Structure with 30% total score apportioned, 194 MDAs (65.4% of the number assessed) scored below average. Such MDAs' are rated under non-compliance. The scores are as outlined hereunder in respect of the number of MDAs that scored below average attainable mark in the sub indicators:

S/N	INDICATOR	Number Of MDAs	Percentage of Total Number of MDAs Assessed
i	Organizational Culture	175 MDAs	58.7%
ii	Board Governance	155 MDAs	57.2%
iii	Executive Management	217 MDAs	72.8%

- 8.02 These poor scores are as a result of the MDAs not taking cognizance of structural and operational integrity and compliance issues regarding extant rules and procedures as required and failure of the MDAs to supply the necessary supporting documentation.

- 8.03 Also, under Administrative Systems (30%), we have 216 MDAs (72.5%) scoring below average attainable level of 15%, indicating non-compliance. The scores of MDAs in respect of the under listed sub-indicators are below average mark as follows:

S/N	Indicator	Number of MDAs	Percentage of Total Number of MDAs Assessed
i	Policies, Procedures, and Records	98 MDAs	32.9%
ii	Ethics and Compliance Education	234 MDAs	78.5%
iii	Anti-Corruption and Transparency Unit (ACTU)	175 MDAs	58.7%
iv	Complaints and Whistleblowing Mechanism	246 MDAs	82.6%
v	Discipline, Sanctions and Rewards Regime	203 MDAs	68.1%

8.04 However, the Financial Management Systems (40%), had a comparative compliance performance rating in 236 MDAs (79.2%) scoring above average attainable level of 20% thereby indicating a higher score and better performance under this indicator.

This sharp contrast with scores obtained under the other indicators are due to factors such as compliance to government e-payment platforms such as GIFMIS, IPPIS, REMITA, etc., regular visits to MDAs by Anti-Corruption Agencies (ACAs), Office of the Auditor General of the Federation, Office of the Accountant General of the Federation, Bureau of Public Procurement, Federal Inland Revenue Service (FIRS) etc. to check their records and ensure compliance. Other factors are computerization of financial processes and dealings and professionalism in the conduct of day-to-day activities.

Consequently, the number of MDAs that scored below average attainable marks on the sub-indicators are as follows:

S/N	Indicator	Number of MDAs Assessed	Percentage of Total Number of MDAs Assessed
i	Finance and Account	70 MDAs	23.5%
ii	Audit	116 MDAs	38.9%
iii	Procurement	119 MDAs	39.9%

Generally, the low scores under Management Culture and Structure and the Administrative Systems as indicated above at 8.01, are due to lack of proper record keeping and policy dysfunction in many MDAs. These indicators are important in the implementation of anti-corruption initiatives and compliance within the MDAs and an impetus to financial probity and ensuring compliance with rules and regulations.

Ethics and Integrity compliance within the MDAs will be achieved and sustained through well-established structures, effective management, proper policies and

records keeping, ensuring that personnel are enlightened and educated on ethics and compliance issues, establishing and sustaining a functional anti-corruption Unit to guarantee whistleblowing mechanisms as well as enforcing disciplinary action to deter others while also encouraging good conduct by rewarding deserving personnel.

## 9. Recommendations

1. ICPC to advise MDAs on the essence and imperative of adopting and displaying their vision, mission and core values in appropriate media for public and general information.
2. ICPC to advise and instruct MDAs to produce, adopt, communicate and enforce policies and codes on whistleblowing, professional ethics, guides on acceptance of gifts, donations, hospitality to reduce and mitigate corruption within the MDAs.
3. The Secretary to the Government of the Federation to inform and advise the President and Commander in-Chief on the imperative to appoint and inaugurate boards of statutory institutions to guide, lead and manage the MDAs.

The findings that certain MDAs do not have boards indicate opaque and rudderless leadership structure which negatively impacts on governance, validity and productivity of the affected MDAs.

4. ICPC to intensify its advocacy to MDAs on the importance of producing and implementing Strategic Plan, conducting System Study and Review and Corruption Risk Assessment to assist in institutionalizing integrity, accountability and appropriate preventive measures to diminish and mitigate corruption.
5. ICPC to advise, direct and instruct MDAs on the policy of keeping functional and effective Asset Verification Units and registers to ensure due monitoring and tracking of public assets including procurement and disposal.
6. Leadership of MDAs must maintain Needs Assessment files and procurement plans and conduct needs assessment preparatory to procurement, and ensure procurements comply with procurement legislations like the Public Procurement Act, 2007, work with the Procurement Planning Committee and Tenders Board.

Anti-Corruption agencies must enforce compliance and adherence of MDAs to the provisions of the Public Procurement Act, 2007 through Corruption Risk Assessment, System Study and Review, Budget Implementation Monitoring, Investigation and possible prosecution of established breaches.

7. Office of the Auditor General of the Federation to direct MDAs to submit audited accounts to OAGF and the Public Accounts Committee. Lists of defaulting MDAs should be submitted to the Office of the President and Commander-in-Chief and Office of the Secretary to the Government of the Federation and the ICPC.
8. The Head of Civil Service of the Federation should direct and instruct MDAs to establish, inaugurate, induct and adequately fund ACTUs "being" vital tools to promote and institutionalize integrity, accountability and anti-corruption precepts in MDAs. Funding of ACTUs will be enhanced and sustained by creating a budget line for ACTUs under the current budgeting system.
9. ICPC should liaise with the Office of the Accountant General of the Federation and Head of Civil Service of the Federation to periodically audit personnel costs of MDAs against numbers recruited and those exiting service.
10. Further inquiries and investigation should be conducted on personnel cost of government especially surreptitious recruitments and appointments called "replacements" which are generally denied by MDAs but personnel cost remains huge despite exit of staff through retirement, resignation, terminations, dismissals, deaths.
11. MDAs that consistently appear in the "High Corruption Risk" categorization should be considered for system study and review of their systems or investigation where appropriate, to ensure adherence to public policy, laws, regulations and directives.
12. The Presidency and SGF to direct MDAs to draw and implement Strategic Action Plan and conduct monitoring and evaluation of their projects annually or biannually.
13. The Head of Civil Service of the Federation is to direct MDAs to create complaint and whistleblowing mechanisms to assist in improving the integrity and compliance issues within the MDAs. This should also cover reward system to encourage ethical behaviour and compliance.
14. The Attorney General and Minister of Justice should examine records of MDAs without establishment instruments and present appropriate bills for such agencies before the National Assembly to regularize their existence.
15. It is imperative that Ethics and Compliance Education, which is crucial in building public systems and practices of integrity, is prioritized by all MDAs. This also requires ethics training plans and compliance initiatives.

## 10. Conclusion

ICPC is committed to ensuring probity, transparency and accountability in public offices. The EICS is a veritable tool in driving and strengthening ethics, integrity and diminishing abuses and corrupt practices in MDAs.

The annual deployment of the tool reflects these and indicates that the Commission is focused on identifying and mitigating ethical and compliance weaknesses while also enhancing organizational strength for management, financial and administrative performances.

This year's assessment of public organizations has been able to compare previous and current responses of MDAs to the deployment and also engender organizational, sectorial and national improvements in the MDAs. Recommendations proffered will further boost the acceptance, validity and sustainability of the annual exercise.

The Commission enjoins all MDAs to domesticate the tool in their organizations as enforcement and other measures such as System Study and Review, Investigation and possible prosecution of offences may be taken against non-responsive ("High Corruption Risk MDAs"). Participation and adoption of the ethics and integrity compliance practices by organisations are critical to the assimilation and success of National Ethics and Integrity Policy, a fundamental agent for national rebirth and development.

## APPENDIX I:

### ANALYSIS BASED ON THE INTEGRITY AND COMPLIANCE REQUIREMENTS

Organizational Culture		Management Culture And Structure							
S/N	Question	Attainable Average	Average Score Obtained	Number Of MDAs With Zero Score	MDAs With Zero Score (%)	Number Of MDAs That Scored Below Average	MDAs That Scored Below Average (%)	Number Of MDAs That Scored Above Average	MDAs That Scored Above Average (%)
1	Does the Organization have document(s) relating to its values?	5	7.8	57	19.1	59	19.8	239	80.2
2a	Does the Organization have publicly displayed statements on its mission, vision and organizational core values?	2.5	4.1	30	10.1	34	11.4	264	88.6
2b	Does the Organization have a system for staff to sign off as having read and understood its core values, mission and vision?	2.5	1.1	227	76.2	230	77.2	68	22.8
3	Are Management level cadre officers involved in decision-making?	5	5.1	109	36.6	148	49.7	150	50.3
4	Are personnel involved in decisions that affect them?	5	3.8	154	51.7	191	64.1	108	36.2
5	Does the Organization ensure compliance with the core values, and how?	10	8.3	121	40.6	162	54.4	136	45.6
6	Do personnel of the Organization report non-compliance by staff? If yes, what actions did management take?	5	3.7	167	56.0	183	61.4	115	38.6
7	Does the Organization have an Ethics and Compliance Officer?	5	6.2	74	24.8	82	27.5	215	72.1
8a	Are there policies regarding acceptance of gifts, donations, hospitality, etc.?	5	3.8	169	56.7	180	60.4	117	39.3
8b	Are policies/code of conduct regarding acceptance of gifts, hospitality, donations, and sponsorship enforced, etc.?	5	0.9	260	87.2	270	90.6	28	9.4

BOARD GOVERNANCE		MANAGEMENT CULTURE AND STRUCTURE							
S/N	Question	Attainable Average	Average Score Obtained	Number Of MDAs With Zero Score	MDAs With Zero Score (%)	Number Of MDAs That Scored Below Average	MDAs That Scored Below Average (%)	Number Of MDAs That Scored Above Average	MDAs That Scored Above Average (%)
1a.	Does the organization have a board in place?	2.5	3.4	77	28.5	88	32.6	182	67.4
1b.	Does the Organisation have an instrument for the establishment of the governing board/Council?	2.5	3.9	51	18.9	60	22.2	210	77.8
2a	Does the Board hold regular meetings?	2.5	2.8	100	37.0	116	43.0	154	57.0
2b	Does the Board comply with quorum requirements for meetings?	2.5	3.0	99	36.7	110	40.7	160	59.3
2c.	What is the mode of communication with Board members regarding meetings?	2.5	2.8	112	41.5	121	44.8	149	55.2
3	What are the statutory functions of the Board?	5	6.4	82	30.4	87	32.2	161	59.6
4	Are the decisions of the Board in line with the conditions of service and operational manual of the organization?	7.5	4.1	162	60.0	184	68.1	86	31.9
5	Is there any Code of Ethics for the Board?	5	2.2	174	64.4	237	87.8	33	12.2
6	Does the Organization conduct induction courses for the newly appointed Board members?	2.5	1.0	211	78.1	222	82.2	48	17.8
7	Does the Organization conduct periodic capacity development training for Board members?	2.5	1.1	225	83.3	231	85.6	39	14.4
8	Does the Board conduct periodic self -assessments for members?	2.5	4.9	164	60.7	167	61.9	103	38.1
9	Do the Board and the Management of the Organisation collaborate in policy formulation and implementation? (for example, the development and implementation of the organization's strategic plan)	7.5	4.2	152	56.3	180	66.7	90	33.3
10	Does Management implement resolutions/recommendations from the Board?	5	0.8	249	92.2	249	92.2	21	7.8

Executive Management		Management Culture And Structure							
S/N	Management Culture And Structure	Attainable Average	Average Score Obtained	Number Of MDAs With Zero Score	MDAs With Zero Score (%)	Number Of MDAs That Scored Below Average	MDAs That Scored Below Average (%)	Number Of MDAs That Scored Above Average	MDAs That Scored Above Average (%)
1a	Does the Organization have a Strategic Plan?	10	8.6	140	47.0	156	52.3	142	47.7
1b	Is there an Operational or Work plan from the Strategy?	5	3.9	162	54.4	171	57.4	127	42.6
2a	Are the implementations of Departmental work plans on-going or completed for the last year?	2.5	1.9	173	58.1	191	64.1	107	35.9
2b	Are the responsible staffs submitting reports on the work plan?	2.5	1.4	209	70.1	220	73.8	78	26.2

Audit		Financial Management Systems							
S/N	Question	Attainable Average	Average Score Obtained	Number Of MDAs With Zero Score	MDAs With Zero Score (%)	Number Of MDAs That Scored Below Average	MDAs That Scored Below Average (%)	Number Of MDAs That Scored Above Average	MDAs That Scored Above Average (%)
1	Does Management undertake quarterly audit of all departments?	5	5.7	96	32.2	117	39.3	181	60.7
2	Are Internal and External Audits done as and when due?	5	5.1	89	29.9	105	35.2	193	64.8
3a	Is the Internal Audit completely independent of Management interference in the discharge of its duties?	5	7.0	72	24.2	82	27.5	216	72.5
3b	Is the Internal Audit headed by an officer on directorate (or its equivalent) cadre?	5	5.9	109	36.6	117	39.3	181	60.7
4	Who does the internal Auditor report to? (Internal Audit should report directly to the office of the Chief Executive of the Organisation)	5	7.4	63	21.1	73	24.5	225	75.5
5	Are the observations and recommendations of the internal audit implemented by the Chief Executive of the Organization?	10	9.0	101	33.9	124	41.6	174	58.4
6	Does your Organization carry out prepayment and post-payment audit?	2.5	3.1	98	32.9	113	37.9	185	62.1
7	Does the Organization render annual Audited account to the Office of the Auditor General of the Federation, Public Account Committee (PAC) of the National Assembly and other relevant organisation within the first five months of the previous year?	5	4.3	145	48.7	160	53.7	138	46.3
8	What is the mode of selection of the Organisation's external auditors?	5	4.1	157	52.7	174	58.4	124	41.6
9	Does the Organisation have a record of its duly submitted audited account to the Office of the Auditor General and Public Account Committee for the last 3 years	2.5	2.4	137	46.0	159	53.4	139	46.6

Procurement		Financial Management Systems							
S/N	Question	Attainable Average	Average Score Obtained	Number Of MDAs With Zero Score	MDAs With Zero Score (%)	Number Of MDAs That Scored Below Average	MDAs That Scored Below Average (%)	Number Of MDAs That Scored Above Average	MDAs That Scored Above Average (%)
1a	Does the Organisation conduct an annual needs assessment preparatory to its procurement in compliance with the provision of PPA 2007?	2.5	2.7	127	42.6	140	47.0	158	53.0
1b	Does the Organization have an annual procurement plan?	5	5.7	109	36.6	123	41.3	175	58.7
2	Is the Organization's procurement plan part of the annual budget?	2.5	2.8	119	39.9	136	45.6	162	54.4
3a	Does the Organization's procurement process comply with the requirements of the Public Procurement Act 2007 (PPA)?	5	6.0	74	24.8	103	34.6	195	65.4
3b	Is the composition of the Organization's Procurement Planning Committee (PPC) in compliance with the provisions of the PPA 2007?	2.5	2.8	100	33.6	138	46.3	160	53.7
3c	Is the composition of the Organization's Tenders Board in compliance with the provisions of the PPA 2007?	2.5	3.2	88	29.5	113	37.9	185	62.1
4	Does the Organization provide end -users and external partners with principles of ethics and compliance to guide the conduct of business?	5	5.7	112	37.6	123	41.3	175	58.7
5a	Does the Organisation have policies that provide sanctions for Contractors or External Partners who violate Contract Agreement?	5	5.7	111	37.2	124	41.6	174	58.4
5b	Has the Organisation received complaints from bidders, Contractors or relevant Stakeholders on violation of the PPA 2007 in the last three (3) years?	2.5	2.4	145	48.7	161	54.0	137	46.0
6a	Does the Organisation invite relevant Professional Bodies, NGOs and Stakeholders to be part of its procurement process in compliance with the provisions of the PPA 2007?	2.5	2.6	127	42.6	141	47.3	157	52.7
6b	Does the Organisation comply with the requirement to give reasonable period of notice for relevant Stakeholders to attend and observe its procurement process and procedure?	2.5	2.2	144	48.3	166	55.7	132	44.3
7a	Does the Organisation undertake performance certification of on-going (works) project before approvals for payments?	2.5	2.6	127	42.6	141	47.3	157	52.7
7b	Does the Organisation verify goods supplied before payments are made to suppliers or contractors?	2.5	3.1	98	32.9	110	36.9	188	63.1

## **ANALYSES OF INDICATORS AS FACTORS OF SERVICE DELIVERY OR PERFORMANCE OF THE MDAs IN THEIR RESPECTIVE SECTORS AND THE CONTRIBUTIONS TO GOVERNANCE**

The cornerstone of good governance is integrity. The integrity of public officials is the main thrust of good governance. The ethics and integrity management framework is an integrated approach for building processes and structures to entrench integrity and prevent corruption in public organisations. The integrity framework takes into consideration essential factors and conditions for implementation that influence the integrity of officials in public organisations.

The integrity management framework consists of all the components such as policies and practices required contributing to the performance of public institutions. The basic characteristic of an integrity management system is that it outlines the elements and conditions that are expected from all stakeholders within the system.

Any organisation that implements its mandate and strives to achieve its organisational objective should exhibit a viable integrity management framework such as:

- Clearly articulated anti-corruption policy
- Sustained ethics and integrity compliance programmes
- Implement anti-corruption awareness and capacity building programmes
- Installed corruption reporting channels
- Report to external stakeholders about corruption – Anti-Corruption Agencies (ACAs), Government, NGOs, etc.

The interaction between the integrity policies and the agencies' personnel are crucial for overall effectiveness. As with any other public policy, performance measurement (evaluation) provides evidence for the design of more effective public integrity policies. It also supports implementation by helping policymakers to monitor compliance with integrity policies, detect potential bottlenecks and identify unaddressed integrity risks.

The Ethics and Integrity Compliance Scorecard (EICS) is essentially to track ethical, integrity and compliance loopholes or gaps in MDAs and thereupon recommend mitigating measures to management of public agencies and

the government. KPIs and the sub-indicators set out in the scorecard are also focussed on ethics and integrity benchmarks that MDAs must adhere to in management and leadership, financial performance and administrative processes to ensure productivity and quality service delivery.

## 2.0 Governance Criteria of Indicators/Sub-Indicators

### A. Management Culture & Structure

Indicator	Governance Criteria
Organisational Culture	Formal definition and practice of the organisational value system
Board Governance	Governance over -sight of senior management and staff including setting and monitoring performance standards
Executive Management	Supporting the board, strategic planning and co -ordinating day-to day operations of the organisation

### B. Financial Management Systems

Indicator	Governance Criteria
Finance & Accounts	Existence of standard finance & accounting practices
Audit	Existence of audit
Procurement	Existence of procurement & contract management systems
Financial Transparency & Compliance Records	Existence and compliance with standard financial systems, transparency and accountability

### C. Administrative Systems

Indicator	Governance Criteria
Policies, Procedures & Records	Existence of clearly articulated anti -corruption policy
Ethics & Compliance Education	Anti-corruption awareness and capacity building programmes
ACTU	Established compliance monitoring structure
Complaints & Whistleblowing Mechanism	Existence of corruption reporting channels
Discipline, Sanctions and Reward Regime	Existence of appropriate disciplinary procedures and rewards for integrity and efficient personnel management practices

#### ANALYSIS OF THE PERFORMANCE INDICATORS AND SECTORIAL NON COMPLIANCE RATINGS

147 MDAs (48.8% of MDAs accessed) were rated as non-compliant with scores less than 50.0. Analysing their ethics and integrity management frameworks based on the Key Performance Indicators (KPIs): Management Culture & Structure; Financial Management Systems; and Administrative Systems, showed deficits in these indicators which have impacted on their overall performance on the scorecard.

The slightly average performance in terms of the Financial Management Systems are as a result of the existence of statutorily mandated structures for Finance & Accounts, Procurement and Audit which have to be put in place for regular running of the organisations.

The performance of the organisations in terms of Management Culture & Structure was observed to be weak and careful observation of the sub-indicators revealed that the sub-indicator that was largely deficient was organisational culture wherein there were no clearly defined organisational values.

With respect to Administrative systems, the major thrust of the observed weak performance is the lack of appropriate administrative structures for articulating ethics and integrity standards and with no clearly articulated anti-corruption policies and mechanisms for monitoring integrity violations coupled with low levels of awareness on ethics and integrity.

The governance indicators are measured on the basis of: strategy, effectiveness and compliance. In terms of the effects of their scores on service delivery, it can be observed that the MDAs rated as non-compliant are not performing optimally in their different sectors which can remotely be adduced to their deficient ethics and integrity management systems.

These observations can be viewed at a glance on the graphic presentations of the non-compliant MDAs in the different sectors evaluated by the Ethics and Integrity Compliance Scorecard.

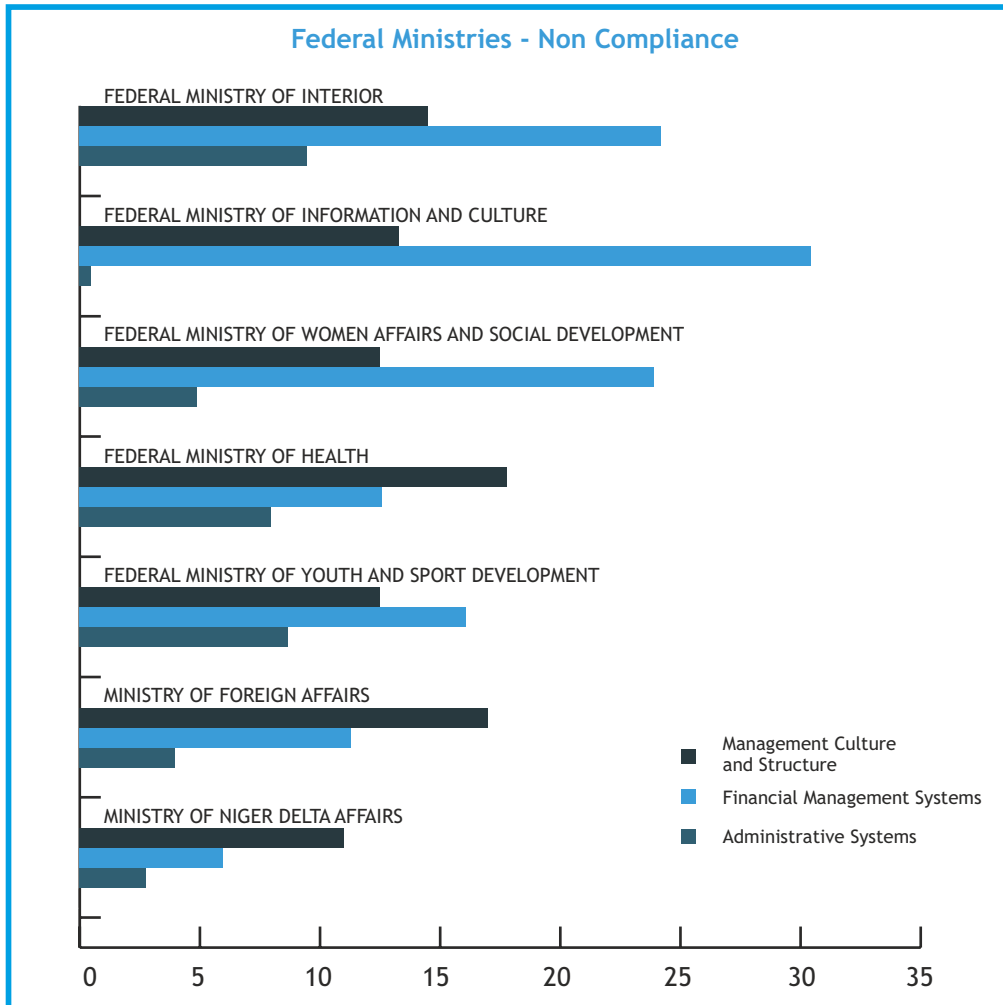

**Science & Technology Sector**

A cursory look at the non-compliant MDAs in the Science & Technology sector reveals organisations that are performing below expectations in terms of the impact expected of them in contemporary Nigeria. This is due to the fact that the objectives for establishing them have not been fully realised given the slow pace of national development in science and technology.

The scores attained by the agencies above is a reflection of the integrity status of these entities and the officials saddled with the responsibility of driving innovations in Science and Technology in Nigeria.

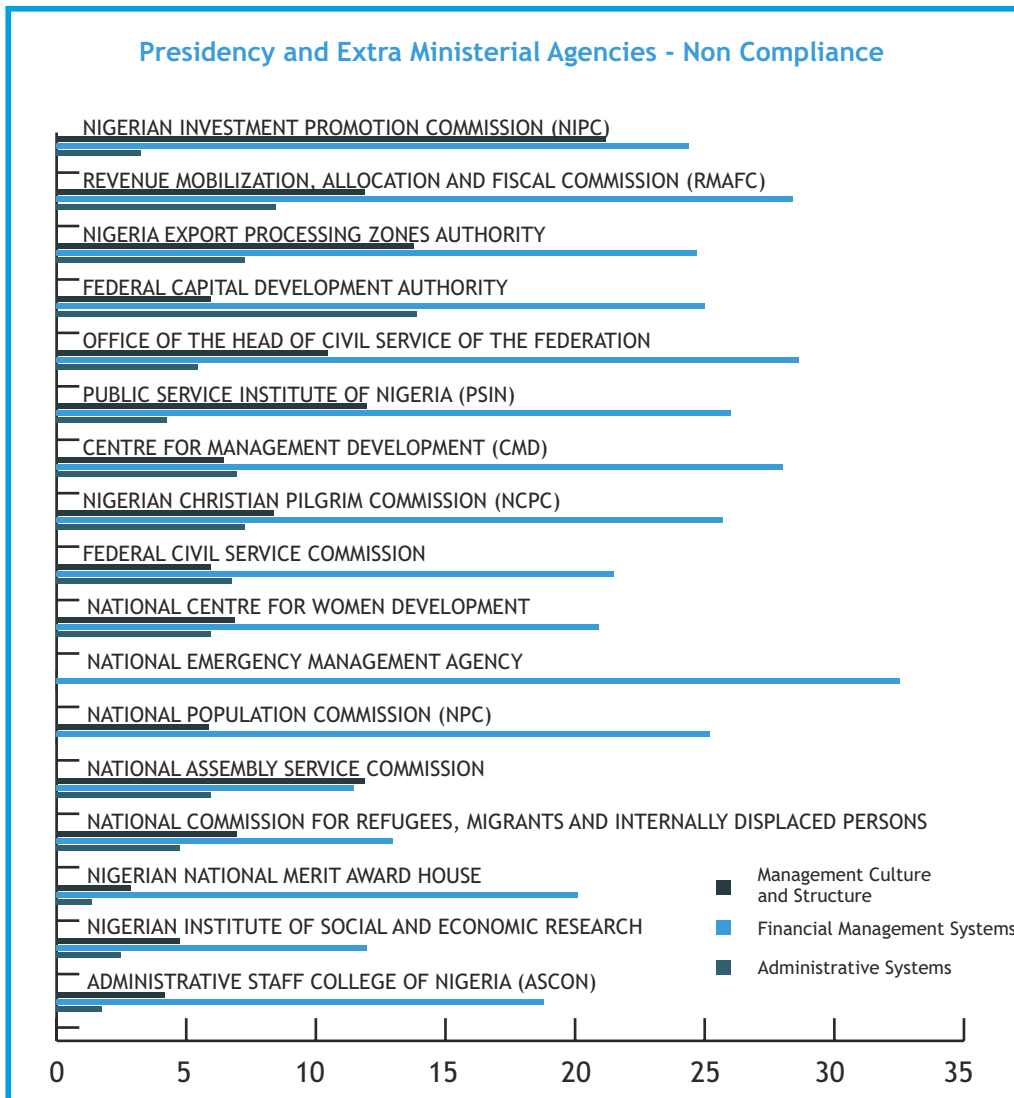

**Federal Ministries**

The Seven (7) Federal Ministries that were non-compliant on the Ethics and Integrity Compliance Scorecard were mostly deficient in the Administrative Systems indicator. The Ministry of Niger Delta Affairs especially performed weakly on all indicators and their performance on the Ethics and Integrity Compliance Scorecard may be a pointer to the unsatisfactory performance.

**Presidency/Extra-Ministerial Agencies**

The Fifteen (15) Extra-Ministerial organisations that were non-compliant on the Ethics and Integrity Compliance Scorecard were mostly deficient in the Management Culture & Structure and Administrative Systems indicators.

On the non-compliance index of the sector were the following agencies: The National Population Commission and the National Emergency Management Agency. Given the critical roles and the impact of these organisations in the polity, there is great need to address their integrity structures.

## Regulatory Sector

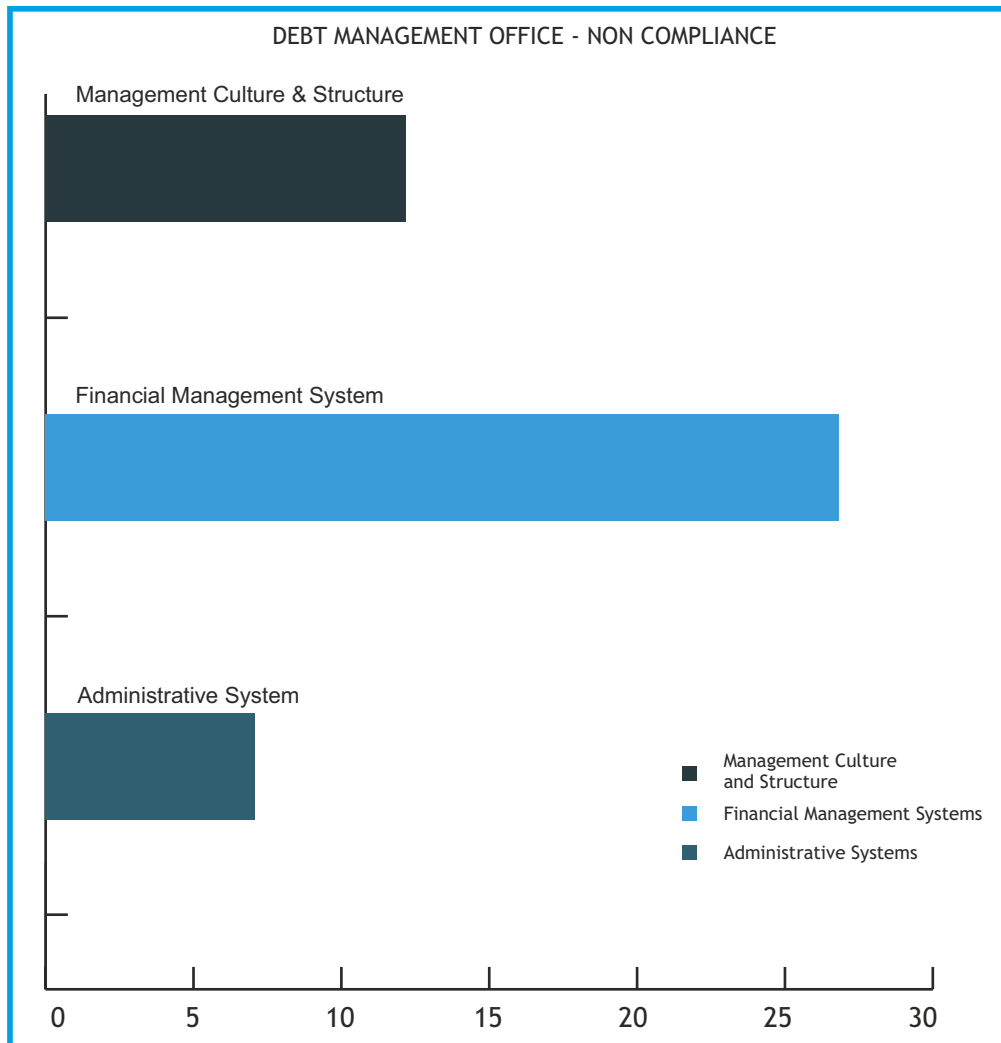

The non-compliant agencies in the Regulatory Sector have deficits mostly in the following indicators – Management Culture and Structure and Administrative Systems. The Petroleum Product Pricing Regulatory Agency (PPPRA) performed weakly on all indicators. Given the impact of petroleum pricing on the national economy, there is great need to pay attention to the Ethics and Integrity Management systems of PPPRA.

## Justice & Law Enforcement Sector

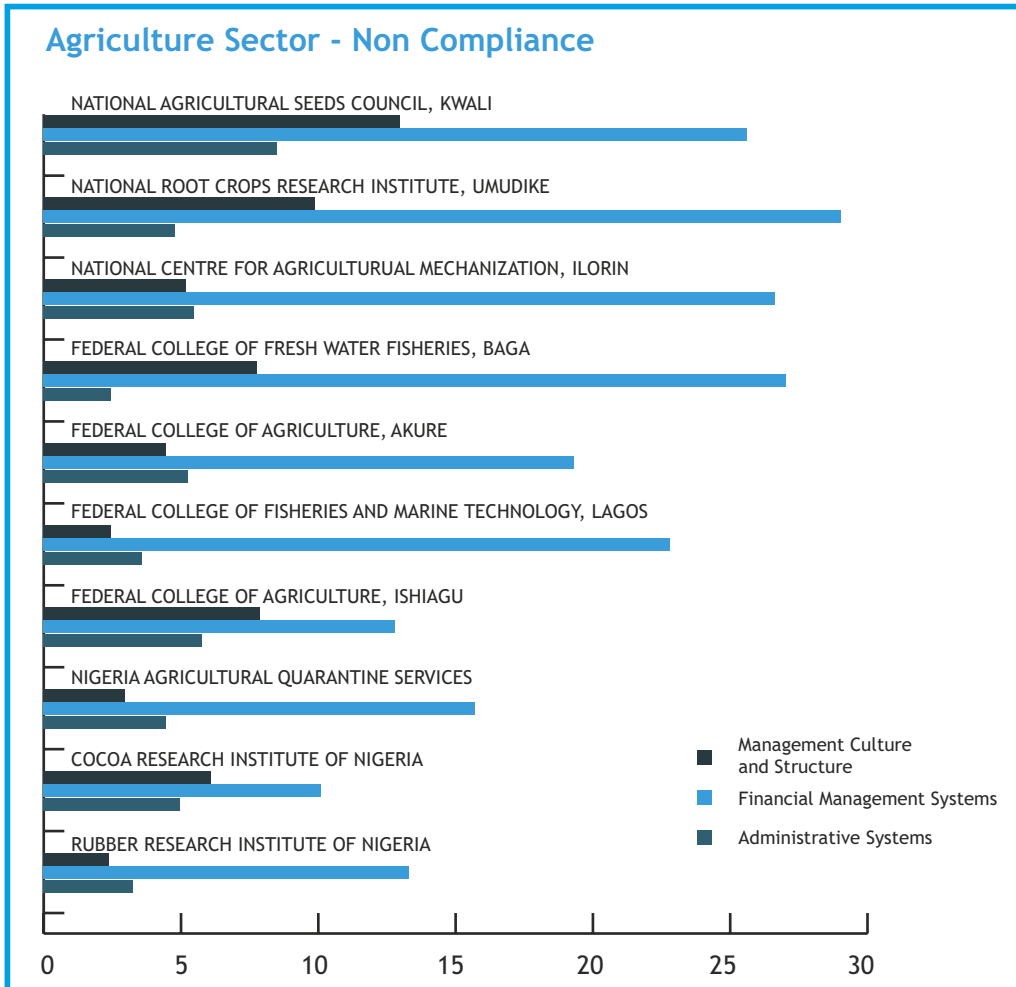

The Justice and Law Enforcement sector is a critical sector in the national polity. With Twelve (12) MDAs in the sector being rated as non-compliant on the Ethics and Integrity Compliance Scorecard (EICS), there is need for adequate attention to be paid to the integrity systems therein as it has potential to impede justice delivery and law enforcement in the country.

### Finance & Banking Sector

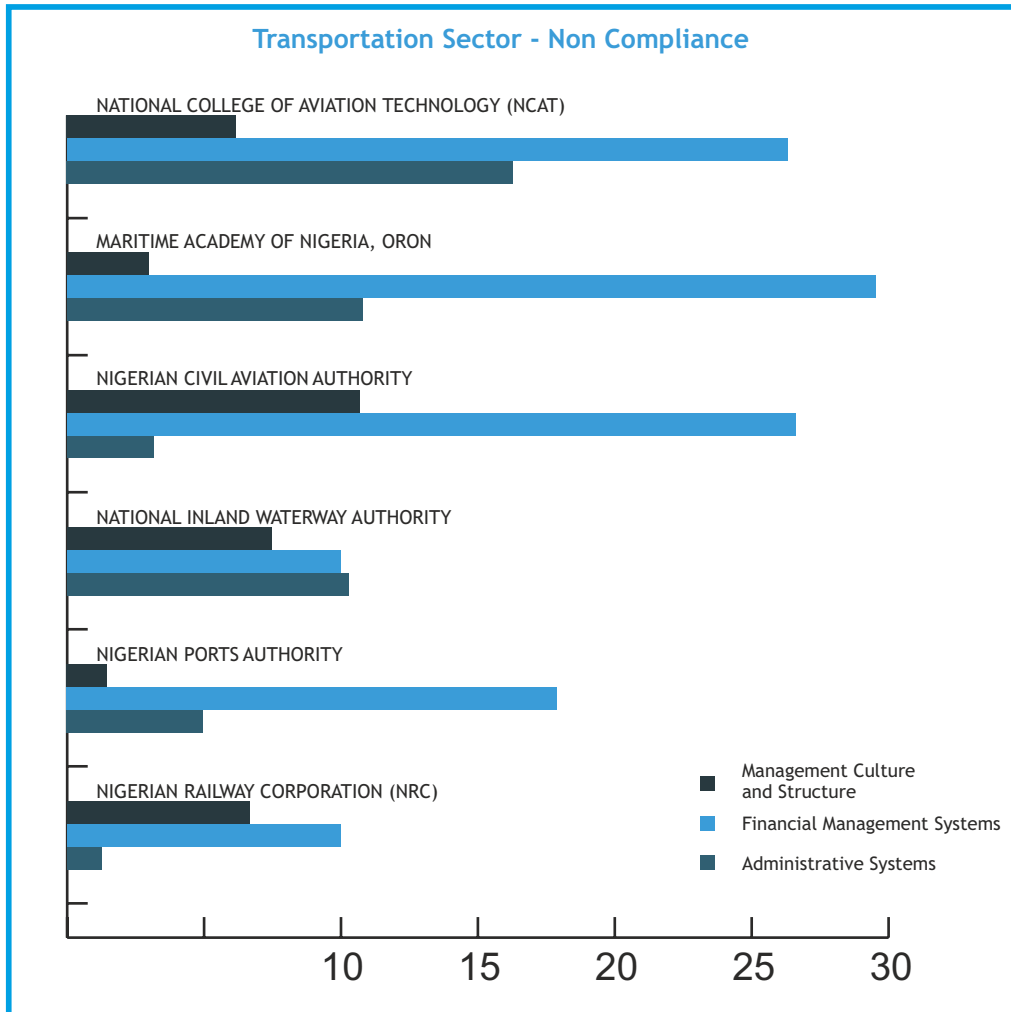

The Debt Management Office scored below average on the Ethics and Integrity Compliance Scorecard. The MDA needs to put in place Administrative Systems for ethics and integrity given its critical role in the economy. Attention should also be paid to the Management Culture and Structure.

## Agriculture Sector

The inability of Nigeria to attain food sufficiency is a product of the performance of MDAs in the Agriculture sector. Productivity is hampered when officials do not operate within the confines of ethics and integrity. The MDAs in the sector scored very weakly in Management Culture & Structure and Administrative Systems

**Transportation Sector**

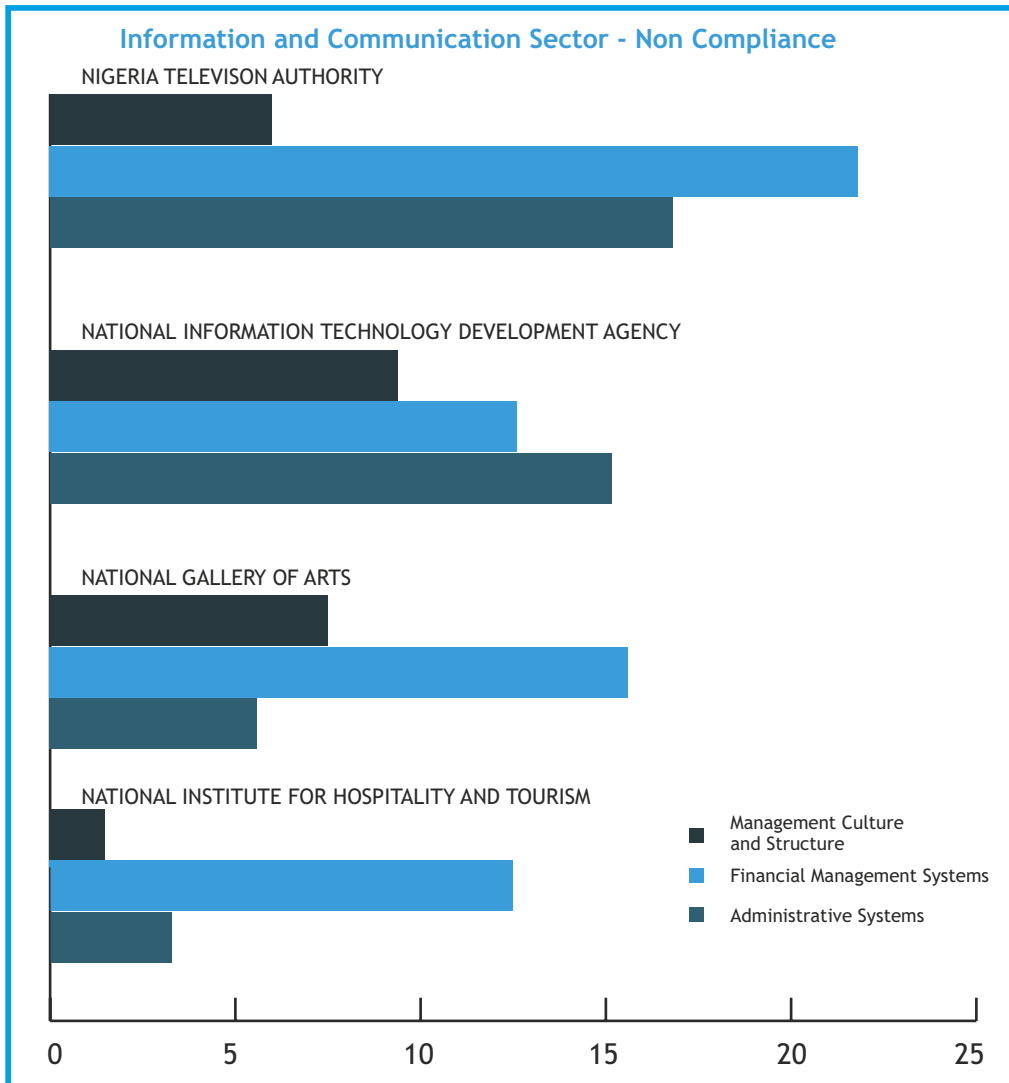

The full benefits of the transportation sector are not being derived, especially the rail and the inland water way transportation. A detailed look at the performance of agencies in the sector on the Ethics and Integrity Compliance Scorecard indicates low levels of compliance with ethics and integrity policies.

Despite the potential for transportation on the inland waterways in the country, the National Inland Waterways Authority is yet to fully optimise transportation in the sector.

The National Railway Corporation is yet to fully develop systems that would eradicate corruption in the sector based on interactions with customers.

**Information & Communication Sector**

Four (4) MDAs in the information sector were rated non-compliant on the Ethics and Integrity Compliance Scorecard. The performance of the National Gallery of Arts and the National Institute for Hospitality and Tourism on the EICS require urgent attention in the sector. The tourism sector is a viable pathway to socio-economic development therefore there is a need to ensure the integrity management systems in the sector are effective.

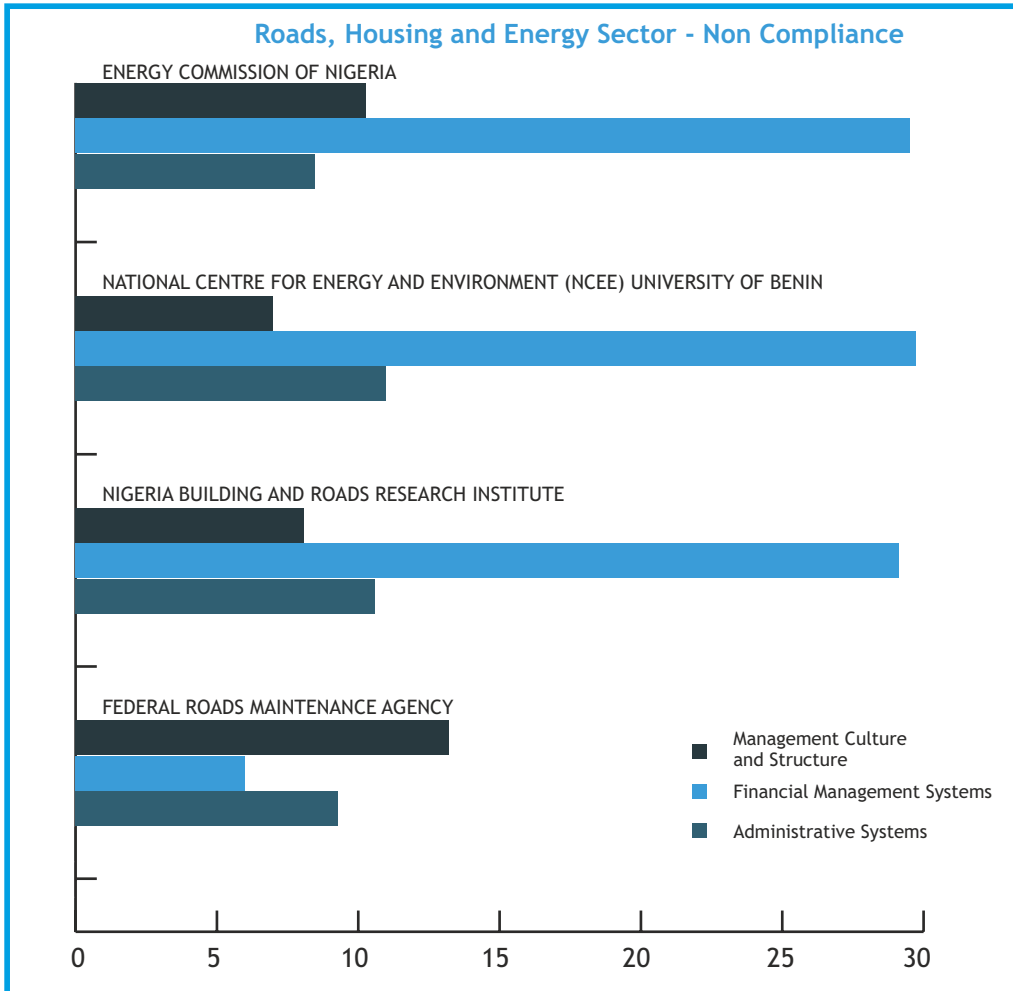

## Water Resources Sector

The performance of agencies in the Water Resources sector in terms of achieving the goals for which they were established is low. The River Basin Development Authorities (RBDAs) have been observed to perform below expectations.

The weak performances of these organisations whereby 8 out of 12 are non-compliant on the Ethics and Integrity Compliance Scorecard which is remotely a function of the state of their ethics and integrity systems. The FCT Water Board has not also performed optimally as most parts of the Federal Capital Territory are yet to be connected to public water supply.

**Roads, Housing & Energy Sector**

The organisations listed in this sector as non-compliant on the Ethics and Integrity Compliance Scorecard is largely deficient in terms of achievements of their mandates.

The state of federal roads nationwide that are not properly maintained is an indictment on the Federal Roads Maintenance Agency. The performance of the organisation on all indices measured on the Ethics and Integrity Compliance Scorecard is weak.

The energy policies resulting from the Energy Commission of Nigeria cannot be said to have really impacted on the polity given that Nigeria is yet to have coordinated solutions to the energy problems in the country.

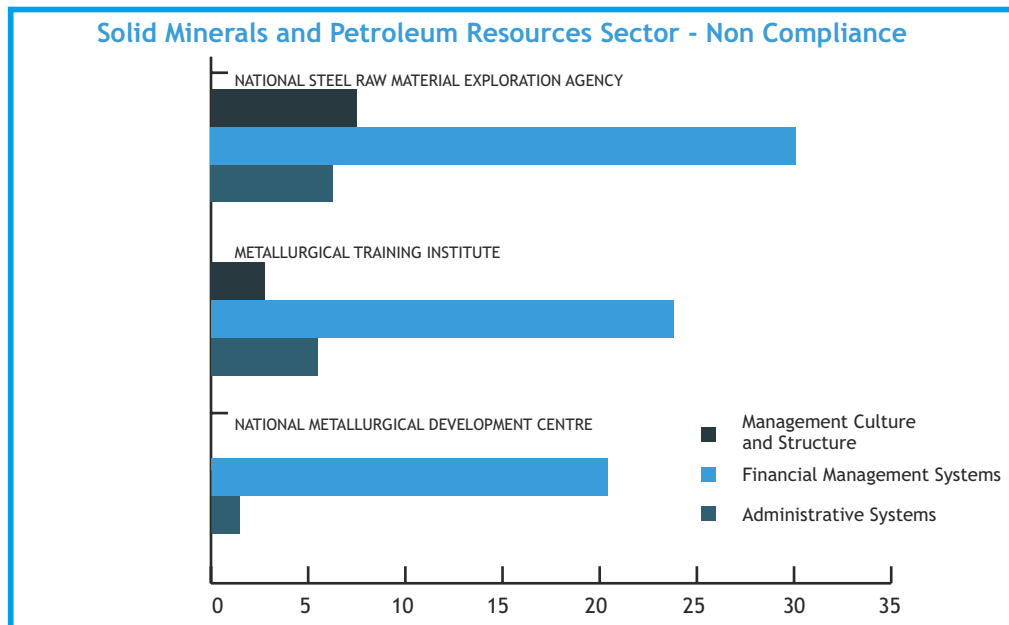

**Environment Sector**

The non-compliant MDAs in the Environment sector require attention especially on indicators such as Management Culture and Structure and Administrative Systems on the Ethics and Integrity Compliance Scorecard. The Forestry Research Institute of Nigeria as a case in point scored zero (0) on Management Culture and Structure and Administrative System indicators. The impact of the organisation in terms of dissemination of results of forestry research and research into forest products utilisation has been low.

**Solid Minerals & Petroleum Resources Sector**

The three (3) non-compliant public organisations in the Solid Mineral sector are observed to be most deficient in two key indicators of: Management Culture & Structure and Administrative Systems on the Ethics and Integrity Compliance Scorecard. The Solid Minerals sector in Nigeria is yet to be fully developed given the funds the Federal Government has invested in the sector. The inability of the sector to perform optimally could be accentuated by the deficient integrity systems inherent in the organisations in the sector.

## Education Sector

### Education Sector - Non-Compliance

Twenty-Seven (27) MDAs in the Education sector were non-compliant on the measures of the Ethics and Integrity Compliance Scorecard. This is a confirmation of the level of integrity deficiencies in the sector despite government investments in education. Integrity deficiencies in the sector have a direct impact on national development as the pace of national development is dependent on the intellectual capacity of its citizens.

## Health Sector

### Health Sector - Non-Compliance

Twenty-Six (26) MDAs in the Health sector were non-compliant on the Ethics and Integrity Compliance Scorecard. This to an extent confirms the widespread complaints of unsatisfactory service delivery within the health sector and its impact on healthcare services. There is a need to pay optimal attention to health care delivery as the sector has direct implications on the well-being of the populace.

#### 4.0. Conclusion

There is great need to pay prime attention to the ethics and integrity management frameworks of MDAs as they impact on the ability of the organisations to deliver optimally on their objectives. A failure to pay attention to integrity systems leads to integrity deficiencies which impact on the public reputation of the organisations.

**OVERALL RATING**
